

L126

digital indicator

no compromise on quality

Avery Berkel

no compromise on quality

If you want a straightforward, low-cost indicator – but don't want to compromise on quality - you can't beat the Avery Berkel L126.

Manufactured in stainless steel, this waterproof, compact digital indicator is very simple to use and can be linked to a vast range of load cells, bench and platform scales. You'll find it invaluable for basic weighing throughout your business – including wet, harsh and hygienic environments.

Weights and Measures 6000 division performance is standard, ensuring quality, accuracy and reliability at all times.

◆ **Hygienic, waterproof design**

The **L126** features a pickled and electro-polished stainless steel finish for maximum hygiene, ease of cleaning and durability. It is also fully waterproof to IP65/66/67 standards, making it ideal for food industry, chemical and pharmaceutical applications.

◆ **Simple operation**

With its simple key arrangement, the **L126** is very straightforward to use. The large tactile keys can be operated easily, even with gloved hands and a remote key function enables tasks to be carried out via a foot or hand switch.

◆ **Easy-to-read LED display**

The large character, bright green LED display is easy to see under all conditions, including at-a-distance supervisory reading.

◆ **Flexible connections**

The RS232 serial output enables connection to a wide range of peripheral devices. With the option of battery-backed real-time clock, the **L126** also offers reporting capabilities for totals information and management control.

◆ **PLC/data logger option**

L126 offers the option of a highly accurate analogue interface ideal for data logger or PLC control with 1-5, 4-20 10-50 mA or 0-5, 0-10 V.

◆ **Print and data options**

Programmable transmission enables you to request print or data outputs remotely to suit your system.

◆ **Create customised labels**

The **L126** provides simple printed labels, with the option of creating your own customised alphanumeric layouts. A date and time facility is also available for traceability.

◆ **Choice of trip output and input options**

Three control inputs are provided as standard. For greater flexibility and control of plant operations, eight output trips and eight further inputs can be added.

◆ **Tare facilities**

A variety of tares, including semi-automatic, is included to increase the speed and efficiency of weighing tasks. Tares can be remotely controlled for convenience and security.

◆ **Range of installation options**

Wherever you need to install your indicator, the **L126** has the ideal solution. A desk/wall stand is provided as standard with the option of a pole mounting kit.
